NE SITE LEADER WORKING SESSION · 60 MINUTES

From Flags to Ownership

The one idea: attendance is holding (90.1%, goal 80%). What's slipping is reliability around the session: coverage, cancellations, and closing the loop in Pearl. A flag is a conversation that happened too late. We want the region to hear it from the site first.

TIME	SLIDES	BLOCK	WHAT YOU DO	MOVE · MATERIALS
0:00	1–3	**Open**	Frame it as a working session, not a reprimand. Name the three takeaways: a routine, an escalation path, a commitment. Then silent jot, and cold call two people warmly. Listen for the gap between when the tutor knew and when the SL knew.	Stop & Jot · 2 min
0:05	4–7	**What's working, what slipped**	Credit first (survey completion is a habit they already built). Then the reframe: attendance is fine, reliability isn't. On slide 6, let the top bar land: tutor absence outranks scholars being absent from school.	Turn & Talk · 3 min, cross-campus pairs · chart paper for causes
0:15	8–9	**Who owns what**	"Move the catch to the left." Spend the most time on the Site Leader column. Say it out loud: only SLs can cancel in Pearl, and the reason locks afterward.	Ask: "What here isn't happening today?"
0:22	10–12	**Routines**	Tutor routine (one rule: nobody leaves with an open session), then the SL rhythm (morning coverage check + end-of-day sweep). Hand out the two one-pagers here.	Turn & Talk · 3 min · Tutor Routine + SL Playbook
0:32	13–18	**Escalation**	Ladder → three questions (do call-and-response) → four-line message. Pairs sort 8 cards for 7 minutes; you debrief C, D, G, H by cold calling a pair before revealing each answer.	Scenario Sort · 10 min · Escalation Protocol + card sets
0:50	19–21	**Commit + close**	Six signs for Nov 19. Three minutes of silent writing, then a whip-around: "At my site, starting Monday, I will…" Collect the cards or photograph them. Last word to Taneisha.	Everybody Writes · 5 min · Commitment Cards

PREP CHECKLIST

- 10-minute sync with Taneisha: agree on the "one NJTC voice" rule (SL handles teachers; PM handles administration)
- Print one Escalation Protocol, SL Playbook, and Tutor Routine per person, plus extra Tutor Routines to share with tutors
- One scenario card set per pair (cut ahead of time) and one commitment card per person
- Timer visible; chart paper and markers
- Portal open to **Site Leader Flags** (NE) in case someone asks "where do I see this?"
- Confirm the Nov 19 check-in on calendars

SCENARIO SORT · ANSWER KEY

Who owns it, how fast, who's next

A · Tutor out sick at 7:40 a.m.

OWNER Site Leader (the tutor did the right thing by texting early)

HOW FAST NOW before the first session

NEXT Cover, regroup, or cancel with a reason. Can't cover? Tell the PM before the session starts. Never leave it open in Pearl.

B · Group kept in class 3 times

OWNER Site Leader. The tutor logs "Classroom Teacher Requested…" each time and tells the SL.

HOW FAST THIS WEEK it's already a pattern

NEXT SL talks with the teacher. If it continues, the PM raises it with administration using the four-line message.

C · "Kids are being mean to me"

OWNER Site Leader, today

HOW FAST TODAY wellbeing (the portal flags this as Escalate, 24 hrs)

NEXT SL tells the classroom teacher or counselor per the school's process, and tells the PM the same day. The tutor checks in gently next session.

D · Assembly takes the whole group

OWNER Site Leader (tutors can't cancel in Pearl)

HOW FAST BEFORE IT STARTS

NEXT Cancel with "School Event/Assembly." Don't log it as missed. No escalation needed. Reasons can't be added after cancelling.

E · Incomplete sessions, second time

OWNER Tutor fixes today. SL coaches, because it's now a pattern.

HOW FAST TODAY

NEXT The end-of-day sweep should have caught it. A third time goes to the PM with dates as a documented concern.

F · No lesson plans for two weeks

OWNER Site Leader

HOW FAST THIS WEEK

NEXT Direct conversation with a due date. If it's missed again, escalate to the PM, documented. (Lesson plans are the #1 NE concern type on record.)

G · Principal moves the period

OWNER Program Manager, after the SL raises it

HOW FAST SAME DAY

NEXT The SL doesn't agree on the spot: "Let me loop in my PM so we get it right." The PM confirms with administration and updates Pearl.

H · Tutor wants to email the principal

OWNER Site Leader

HOW FAST SAME DAY

NEXT Tutors don't go to administration. The SL solves the room today. If it repeats, the PM raises it. One NJTC voice.

If you hear pushback

"Tutors don't have time to close Pearl before they leave."	It takes about two minutes a session, and it happens during paid time. The SL sweep catches anything missed while the tutor is still in the building.
"Teachers won't release scholars. That's not on us."	Agreed, so it isn't yours to fix alone. It's yours to **raise**. The first conversation with the teacher is the SL's. If it repeats, the PM takes it to administration.
"I can't cover when tutors are out."	That's exactly when to escalate, before the session. Cancel with the right reason so the data tells the truth about coverage.
"The flags are wrong."	Sometimes they are. Send it with the four-line message: what happened, what you checked. Flags that look wrong get fixed faster when you send them up.
"This is more work on top of everything."	These routines replace the chase emails. A five-minute sweep costs less than three days of back-and-forth.

FOR YOUR REFERENCE · DON'T PROJECT

Where the flags live, by school

Oct 19 – 30, 2026, from Pearl (refreshed Nov 3). Use it to prepare one-on-one follow-ups, not to call out sites in the room. Shaded cells are worth a conversation.

SCHOOL	SCHOLAR ATTENDANCE	MISSES: TUTOR ABSENT	UNCOVERED SESSIONS	KEPT IN CLASS	LEFT INCOMPLETE	ATTENDANCE NOT RECORDED	CANCELLED, NO REASON	BLANK REASON
Lyndhurst Middle School	**68%**	0	0	4	2	8	0	4

iLearn Passaic MS	89%	**24**	0	**44**	0	0	0	1
iLearn Paterson ES	91%	8	0	4	**5**	**20**	0	1
iLearn Paterson MS	94%	4	0	0	0	0	**12**	0
iLearn Paterson Silk City	89%	4	**24**	0	0	0	0	0

HOW TO READ IT

- **Scholar attendance** follows the partner-report definition (tutor absences and school closures don't count against scholars). Lyndhurst MS only began in late October, so its numbers are small.
- **Misses: tutor absent** counts scholar seats lost because the tutor was out. This is the region's #1 miss reason (189 in two weeks). Clifton ES and Hudson MS carry most of it.
- **Uncovered sessions** were cancelled as "Tutor Vacancy." Silk City and Clifton MS show an open position, not a daily routine problem. Confirm the hiring status before the meeting.
- **Left Incomplete / not recorded** are pure routine flags, and the end-of-day sweep removes them. Clifton MS, Hudson MS, and Paterson ES are the places to start.
- **Cancelled, no reason** can't be fixed after the fact (Pearl locks it), only prevented. Clifton ES and Paterson MS account for most of them.

REGION TOTALS BEHIND THE DECK (OCT 5 – 16 → OCT 19 – 30)

Cancelled 38 → 116 · cancelled, no reason 0 → 39 · tutor-vacancy sessions 18 → 41 · misses from tutor absence 137 → 189 · kept in class 90 → 118 · blank reasons 6 → 24 · Incomplete 0 → 33 · scholar attendance 92.2% → 90.1%. Year to date: 827 scholars, 2,791 sessions delivered, 90.5% attendance, 97.8% tutor-survey capture, 93.9% of scholar ratings 4–5.
